Stock Tank De-Icers

The "Farm Essentials" line from K&H Pet Products has "reinvented the wheel" when it comes to keeping fresh water available in the winter. Every K&H de-icer is thermostatically controlled and safe to use in all stock tanks, unlike nearly all of the other de-icers available on the market today. No expensive shrouds or cages need be purchased either. Every one of our de-icers can be used as a floating de-icer out of the box or in seconds converts to a submersible de-icer with the click of a button!

In the past, all that was readily available were energy gulping 1000 watt to 1500 watt de-icers. Customers had no choice but to purchase these expensive-to-run de-icers. We've solved this problem by creating a whole line of de-icers along with a convenient zone chart for consumers to choose the correct de-icer every time! A free cord safety clip is also included with every de-icer. This ingenious clip secures the de-icer to the edge of the stock tank, bucket or container to help prevent chewing, cribbing or removal of the de-icer from the tank.
