

Instructions:

Optional Tippy rocker can be installed on the bottom of the toy to make it more enticing. The rocker will make the toy teeter back and forth. We suggest lining up the rocker and finding the middle of the toy and marking the spot with a pen or pencil.

This will give your Tippy toy the best balance for optimal fun.

Once you have chosen the spot for your Tippy rocker, peel off the back and adhere to the spot.

We have also included a free bag of catnip. The catnip is optional. Sprinkle some on now to encourage play and save some for a later time.

We hope your cat enjoys their new toy!
