

Instructions:

Optional Tippy rockers can be installed on the bottom of the toy to make it more enticing. The rockers will make the toy teeter back and forth. We suggest lining up the rockers and finding the middle of the toy and marking the spots with a pen or pencil.

Spacing the two rockers apart from one another is ideal.

This will give your Tippy toy the best balance for optimal fun.

Once you have chosen the spots for your Tippy rockers, peel off the back and adhere to both spots.

We have also included a free bag of catnip. The catnip is optional. Sprinkle some on now to encourage play and save some for a later time.

We hope your cat enjoys their new toy!
