**Thank you for purchasing the Thermo-Birdbath™ designed by K&H Pet Products®. The Thermo-Birdbath™ is designed to keep water available and ice-free for birds even during the coldest months while using only 80 watts.**

### IMPORTANT SAFEGUARDS

***When using electrical appliances, basic safety precautions should always be followed including the following:***

- Have a qualified electrician install a properly grounded outlet, acceptable for outdoor use and protected from snow and rain immediately adjacent to the location where the heater will be used. If your outlet is not a GFCI outlet or if you are unsure, have a qualified electrician inspect and install one if needed.
- Do not use extension cords.
- Inspect cord before using. If the cord is damaged do not use.
- Unplug heater at receptacle outlet when not in use or before removal from birdbath.
- Store the heater indoors after the winter season.

#### **WARNING:**

**THE HEATER MUST BE SUBMERGED  
UNDER WATER AT ALL TIMES**

**while it is in use!**

Fill your Thermo-Birdbath™ with water, place the heater in the water onto the circular flat area at the bottom and plug the cord into a GFCI outlet.

#### **STORING YOUR THERMO-BIRDBATH™ 80 WATT HEATER:**

After the winter season, always unplug the heater and remove it from the birdbath. Make sure the heater is dry and properly cleaned before storing it away in a dry, safe place, out of direct sunlight and away from work areas where it may become damaged.

For re-installation, always carefully inspect the heater before plugging it in. Inspect the cord, the housing and the plug for any damage. If you see any cracking of the cord or other damage, **DO NOT USE DEVICE!**
